THE MARYLAND-NATIONAL CAPITAL
PARK AND PLANNING COMMISSION

PRINCE GEORGE'S COUNTY PLANNING BOARD

STAFF REPORT

SUBJECT: Chesapeake Bay Critical Area
Conservation Plan and Conservation Agreement CP-06004
Tantallon on the Potomac, Lot 23

Council District: 8 Planning Area: 80 Municipality: none

OVERVIEW:

The proposal is for the construction of a single-family detached dwelling on a property in the R-R/L-D-O Zones recorded before December 1, 1985. A Chesapeake Bay Critical Area Conservation Plan is required prior to the issuance of any permit by the Prince George's County Department of Environmental Resources. The Planning Board is the final approving authority for Chesapeake Bay Critical Area Conservation Plans.

SITE DESCRIPTION:

The 0.35-acre property in the R-R/L-D-O zones is on the west side of Arrow Park Drive approximately 200 feet north of its intersection with West Tantallon Drive and is located within the Chesapeake Bay Critical Area. The 100-foot-wide Critical Area Primary Buffer and expanded buffer do not occur on the property. There are no streams, wetlands, 100-year floodplain or steep slopes on the site. The site is mostly wooded. No Historic or Scenic roads are affected by this proposal. There are no significant nearby noise sources and the proposed use is not expected to be a noise generator. No species listed by the State of Maryland as rare, threatened or endangered are known to occur in the general region. A Stormwater Design Plan has been approved by DER. The Prince George's County Soils Survey indicates that the principal soils on the site are fill over Tidal Marsh series. The site is in the Developing Tier according to the General Plan.

FINDINGS:

On April 21, 2006, the Subdivision Review Committee determined that the Conservation Plan was in general conformance with the requirements of the R-R Zone, the L-D-O Zone, and the "Chesapeake Bay Critical Area Conservation Manual," however, technical errors were found. Revised plans were accepted on September 13, 2006. This site is not subject to the provisions of the Woodland Conservation and Tree Preservation Ordinance because the entire site is within the Chesapeake Bay Critical Area. Based upon information provided by the State of Maryland, the plan correctly indicates there are no threatened or endangered species, no colonial waterbird nesting sites, no forests with interior dwelling bird species, no Natural Heritage Areas, no waterfowl staging areas, no anadromous fish spawning streams, no wetlands, and no tributary streams on the site. The maximum amount of impervious surface permitted per Section 27-548.17, footnote 4 A(ii) of the Zoning Ordinance is 25% of the gross tract area or 3,850.25 square feet. The plan proposes total impervious surface areas of 3,419 square feet or 21.2%. The

maximum Percentage of Lot Coverage permitted by the Zoning Ordinance for Lot 26, per Section 27-442 Table II of the Zoning Ordinance, is 25% of the contiguous net tract area or 3,850.25 square feet. The proposed Percentage of Lot Coverage is 3,419 square feet or 21.2%. The Prince George's County Department of Environmental Resources will require a soils report in conformance with CB-94-2004 during the permit process review. A Stormwater Design Plan has been approved by the Prince George's County Department of Environmental Resources. No variances are needed for this proposed development.
