

64-002 Duvall Bridge

Telegraph Road at Patuxent River

Patuxent Research Refuge

Laurel vicinity

(U.S. Department of the Interior)

Built in 1907 to replace the wooden bridge that connected the Duvall family plantation, Gladswood, in Prince George's County, with the mill on the Anne Arundel County side, the Duvall Bridge is a single-span steel truss bridge. The bridge is of the Pratt pony truss type, with vertical members in compression and diagonals in tension, and open to the sky. It is one of only three surviving Pratt truss bridges in Prince George's County.
