

69-024-22 Raymond W. Bellamy House (Belmar)
2819 Cheverly Avenue
Cheverly

Built in 1925, the Raymond W. Bellamy House is a two-story frame dwelling in the Spanish Mission style with a hip roof and shaped parapets. It stands on extensively landscaped lots. It was built from the “Alhambra” mail-order house plan then available through Sears, Roebuck and Company, and was one of 23 mail-order houses built (1923–1925) by the development company in the newly platted community of Cheverly. It is one of two known examples of the “Alhambra” model in Prince George’s County. (See also Historic Site 66-042-31.)
