

## **72-009-29 Fairmount Heights World War II Monument**

**701 59th Avenue**

### **Fairmount Heights**

Erected in 1946, this obelisk-like monument is constructed of coursed gray granite and orange sandstone blocks set in random arrangement. Many of Fairmount Heights' young men served their country during World War II; their dedication and sacrifices were commemorated by the residents of Fairmount Heights with the construction of this memorial. The names of soldiers who served and died in the war are inscribed on metal plaques that originally adorned the sides of the stone monument; the plaques have been removed but their restoration is planned.
