

87B-036-21 Sunnyside (NR) (Michael Stone House)

16005 Dr. Bowen Road

Aquasco

Built in 1844, enlarged soon afterwards, Sunnyside is a two-story, side-gabled frame house, one room deep, which was enlarged and connected to an existing separate kitchen building by a one-story enclosed passage. On the immediate grounds stand a nineteenth-century meat house and corn crib. The house was built in 1844 for Dr. Michael J. Stone, prominent local physician and public schools examiner. It is a fine example of a mid-nineteenth-century southern Prince George's County farmhouse and was listed in the National Register of Historic Places in 1987.
