

This map illustrates a residential neighborhood in Piscataway, New Jersey, characterized by a mix of developed areas and natural features. Key elements include:

- Streets:** Major thoroughfares like Route 223 and Maryland Road are shown, along with numerous local streets such as Gerry Court, Strawberry Lane, and various "Creeks" and "Lanes".
- Land Use:** The map uses color-coding to denote different types of land. Red areas likely represent developed or high-density zones, while green areas indicate parks or undeveloped land. Blue hatched regions represent water bodies, including Piscataway Creek and its various branches.
- Infrastructure:** The map shows a network of roads, including a multi-lane highway on the left, and various smaller streets and lanes.
- Geographic Features:** The presence of multiple creeks and a large water body at the bottom suggests a wetland or riparian area. The map also shows several small, irregularly shaped green spaces and parks.
- Labels and Markers:** Numerous labels are present, including street names, park names, and numerical markers (e.g., P.109, P.230, P.312) that likely correspond to specific parcels or points of interest.

The map provides a comprehensive overview of the area's layout, showing the relationship between built infrastructure and natural environments.
