*01- REVISION FOR SHEETS: COMPOSITE 1, 1, 3, 4 & 5a. IF ANY LOTS SHOWN WITHOUT HOUSE FOOTPRINTS IN THIS REVISION WILL BE DEVELOPED, THE SPECIFIC SHEET MUST BE REVISED PRIOR TO THE ISSUANCE OF THE BUILDING PERMIT.

*02- 01/06/10 THIS REVISION INCORPORATES THE RESUBDIVISION OF FORMER LOTS: 27-38 AND 52-56 BLOCK 26 FOR LOTS 62-67 BLOCK 26 (PLAT 84, BOOK PM 229), AND VACATES THE APPROVED 0.55 AC. WOODLAND PRESERVATION AREA ON SHEET 3 OF 5. IN ADDITION, THE WOODLAND CONSERVATION REQUIREMENTS ON SHEET 5 OF 5 IS FULFILLED ON SHEET 3 OF 5 (PLEASE SEE WOODLAND CONSERVATION CHARTS ON EACH SHEET).

*03- 12/13/13 THIS REVISION INCORPORATES THE RESUBDIVISION OF FORMER LOTS: 69, 70, 71, 72 BLOCK 21 AND LOTS 36, 37, 39 BLOCK 21 FOR LOT 77 (PLAT: RECORDATION IN PROCESS, BOOK PM: RECORDATION IN PROCESS). THIS SHEET FULFILLED THE WOODLAND CONSERVATION REQUIREMENTS OF SHEET 5a OF 5.

*04- 12/13/13 THIS REVISION INCORPORATES THE RESUBDIVISION OF FORMER LOTS: 6, 7, 8, & 9 AND 14 TROUGH 22 BLOCK 33 FOR LOT 79 AND OUTLOTS 1 AND 2 (PLAT 22, BOOK PM 229), AND VACATES THE APPROVED 0.15 AC. WOODLAND PRESERVATION AREA. IN ADDITION, THIS SHEET FULFILLED THE WOODLAND CONSERVATION REQUIREMENTS OF SHEET 5a OF 5.

*05- 12/13/13 THIS REVISION INCORPORATES THE RESUBDIVISION OF FORMER LOTS: 1-5 AND 5-47 BLOCK 36 FOR PARCEL C AND B, AND LOTS 1-76 BLOCK 36 FOR PARCEL A AND LOTS 77 THROUGH 84 (PLAT 84, BOOK PM 229), ALSO IT INCORPORATES THE STREET RIGHT WAY AREA, WHICH WAS PREVIOUSLY DEDICATED AND NOT INCLUDED IN THE GROSS TRACK AREA. THIS SHEET FULFILLED THE WOODLAND CONSERVATION REQUIREMENTS OF SHEET 5a OF 5.

*06- 03/16/2021 REVISED LIMITS OF DISTURBANCE FOR FOR LOTS 79 BLK. 33 AND LOTS 1 THROUGH 12 BLK. 44.

*07- 03/02/2023 REVISED LIMITS OF DISTURBANCE FOR LOTS 62-67 BLK. 26. THE 0.07 AC. WOODLAND PRESERVATION AREA ON LOT 57-60 WAS ELIMINATED.

- EXISTING SITE CONDITIONS ARE SHOWN ON THE PLANS TO INCLUDE:
AREA OF FLOODPLAIN
AREA OF WETLANDS
WATERS OF THE U.S. (INTERMITTANT)
- THERE ARE NO SPECIMEN TREES ON SITE. THE FOREST IS IN THE "EARLY SUCCESSIONAL" STAGE. (REFER TO FSD)
- THERE ARE NO STEEP SLOPES PRESENT ON SITE.

NOTE:

PRIOR TO THE ISSUANCE OF ANY PERMITS WHICH IMPACT JURISDICTIONAL WETLANDS, WETLAND BUFFERS, STREAMS OR WATERS OF THE U.S., THE APPLICANT SHALL SUBMIT COPIES OF ALL FEDERAL AND STATE WETLAND PERMITS, EVIDENCE THAT APPROVAL CONDITIONS HAVE BEEN COMPLIED WITH AND ASSOCIATED MITIGATION PLANS.

A 15.22 AC. OFF-SITE MITIGATION EASEMENT IS BEING PROVIDED ON THE "RICHARDSON PROPERTY" ON APPROVED TCP II/130/03.

TCP NOTES

1. Cutting or clearing of woodland not in conformance with this plan or without the express written consent of the Planning Director or Designer shall be subject to a \$1.50 per square foot mitigation fee.
2. The Department of Environmental Resources shall be contacted prior to the start of any work on the site to address implementation of Tree Conservation measures shown on this plan.
3. Property owners shall be notified by the Developer or contractor of any Woodland Conservation Areas (Tree Save Areas, Reforestation Areas, Afforestation Areas, or Selective Clearing Areas) located on their lot or parcel of land and the associated fines for unauthorized disturbances to these areas. Upon the sale of the property the owner/developer or owners representative shall notify the purchaser of the property of any Woodland Conservation Areas.
4. All appropriate bonds will be posted with the Building Official prior to the issuance of any permits. These bonds will be retained as surety by the Building Official until all required activities have been satisfied.
5. The location of all Tree Protection Devices (TPD's) shown on this plan shall be flagged or staked prior to the pre-construction meeting with the Sediment and Erosion Control Inspector from DER. Upon approval of the flagged or staked TPD locations by the inspector, installation of the TPD's may begin. TPD installation shall be completed prior to the installation of initial sediment controls. No cutting or clearing of trees may begin before final approval of TPD installation.
6. All required off-site mitigation shall be identified via an approved TCPH for that site and recorded as an off-site easement in the Land records of Prince George's County.
7. Woodland Conservation- Tree Save Areas and/or Reforestation Areas shall be posted as shown at the time of Tree Protective Device installation and/or start of reforestation activities. These signs shall remain in place.

WOODLAND CONSERVATION AREA MANAGEMENT NOTES

Removal of Hazardous Trees or Hazardous Limbs By Developers or Builders

The developer and/or builder is responsible for the complete preservation of all forested areas shown on the approved plan to remain undisturbed. Only trees or parts thereof designated by the Department of Environmental Resources as dead, dying, or hazardous may be removed.

1. A tree is considered hazardous if a condition is present which leads a Licensed Arborist or Licensed Tree Expert to believe that the tree or portion of the tree has a potential to fall and strike a structure, parking area, or other high use area and result in personal injury or property damage.
2. If a hazardous condition may be alleviated by corrective pruning, the Licensed Arborist or a Licensed Tree Expert may proceed without further authorization. The pruning must be done in accordance with the latest edition of the ANSI A-300 Pruning Standards (Tree, Shrub, and Other Woody Plant Maintenance-Standard Practices).
3. Corrective measures requiring the removal of the hazardous tree or portions thereof shall require authorization by the building or grading inspector if there is a valid grading or building permit for the subject lots or parcels on which the trees are located. Only after approval by the appropriate inspector may the tree be cut by chainsaw to near the existing ground level. The tree stump may not be removed or covered with soil, mulch, or other materials that would inhibit sprouting.
4. Debris from the tree removal or pruning that occurs within 35 feet of the woodland edge may be removed and properly disposed of by recycling chipping or other acceptable methods. All debris that is more than 35 feet from the woodland edge shall be cut up to allow contact with the ground, thus encouraging decomposition. The smaller materials shall be piled into brush piles that will serve as wildlife habitat.

Removal of Hazardous Trees, Hazardous Limbs, Noxious Plants, or Non- Native Plants in Woodland Conservation Areas Owned by Individual Homeowners

1. If the developer or builder no longer has an interest in the property, the home owner shall obtain a written statement from the Licensed Arborist or Licensed Tree Expert identifying the hazardous condition and proposed corrective measures prior to having the work conducted. The tree may then be removed by the arborist or tree expert. The stump shall be cut as close to the ground as possible and left in place. The removal or grinding of the stumps in the woodland conservation area is not permitted.
2. The removal of noxious, invasive, and non-native plant species from the woodland conservation areas may be done with the use of hand-held equipment only, such as pruners or a chain saw. These plants may be cut near the ground and the material less than two inches diameter may be removed from the area and disposed of appropriately. All material from these noxious, invasive, and non-native plants greater than two (2) inches diameter shall be cut to allow contact with the ground, thus encouraging decomposition.
3. The use of broadcast spraying of herbicides is not permitted. However, the use of herbicides to discourage re-sprouting of invasive, noxious or non-native plants is permitted if done as an application of the chemical directly to the cut stump immediately following cutting of plant tops. The use of any herbicide shall be done accordance with the label instructions.

Note: The use of chainsaws is extremely dangerous and should not be conducted with poorly maintained equipment, without safety equipment, or by individuals not trained in the use of this equipment for the pruning/and or cutting of trees.

Woodland Areas NOT Counted as Part of the Woodland Conservation Requirements

1. A revised Tree Conservation Plan is required prior to clearing any woodland area which is not specifically identified to be cleared on the most recently approved Type II Tree Conservation Plan (TCP) on file in the office of the M-NCPPC, Environmental Planning Section located on the 4th floor of the County Administration Building located at 14741 Governor Oden Bowie Drive, Upper Marlboro, Maryland 20772, phone 301-952-3650. Additional mitigation will be required for the clearing of all woodlands beyond that reflected on the approved plans. Although clearing may be allowed, it may be subject to additional replacement requirements, mitigation, and fees which must be reflected on TCP revisions approved by the M-NCPPC Environmental Planning Section.
2. Homeowners or property owners may remove trees less than two (2) inches diameter, shrubs, and vines in woodland areas which are saved but not part of the Woodland Conservation requirements after all permits have been released for the subject property. This area may not be tilled or have other ground disturbances which would result in damage to the tree roots. Raking the leaves and over seeding with native grasses, native flowers or native ground covers is acceptable. Seeding with invasive grasses including any variety of Kentucky 31 fescue is not acceptable.

FOREST RETENTION AREA EDGE MANAGEMENT

When the Limit of Disturbance (L.O.D.) is staked and areas of retention have been established, a review of those trees proposed along the new edge of forest will be performed by a tree expert or qualified professional to determine what practice best suits unavoidable root loss during construction. Critical root zones will be established and one or more of the following may take place:

ROOT PRUNING

TOP PRUNING

FERTILIZATION

IRRIGATION

Trees that present an immediate or future safety hazard should be removed from edges. This selective removal should be authorized by M.N.C.P.&P.C., Environmental Planning Section, Upper Marlboro, MD, Ph: 301-952-3650.

New edges will be mulched 15 to 20 feet in along edge. The mulch should be 1 inch (1") thick on the inside edge, to a depth of three (3") to four(4") inches on the outside edge to help retain moisture in the soil and provide moisture and nutrients to the feeder roots.

NOTES:

1. ATTACHMENT OF SIGNS TO TREES IS PROHIBITED.
 2. SIGNS SHOULD BE PROPERLY MAINTAINED BY CONTRACTOR THROUGHOUT CONSTRUCTION.
 3. AVOID INJURY TO ROOTS WHEN PLACING POSTS FOR THE SIGNS.
 4. SIGNS SHOULD BE POSTED TO BE VISIBLE TO ALL CONSTRUCTION PERSONNEL FROM ALL DIRECTIONS.
 5. SIGNS SHOULD BE INSTALLED AT SAME TIME AS TREE PROTECTION DEVICE.
 6. LOCATE SIGNS WHERE SHOWN.
 7. SIGNS SHOULD BE IN PLACE IMMEDIATELY FOLLOWING STAKE OUT OF L.O.D., AND REMAIN IN PLACE IN PERPETUITY.
8. SPACE @ 50' ON CENTER
9. LONG TERM MAINTENANCE OF SIGNS (POST DEVELOPMENT) WILL BE BY HUNT VALLEY DEVELOPERS (LLC)

- Notes:
1. Retention Areas to be established as part of the forest conservation plan review process.
 2. Boundaries of Retention Areas to be staked, flagged and/or fenced prior to trenching.
 3. Exact location of trench should be identified.
 4. Trench should be immediately backfilled with soil removed or organic soil.
 5. Roots should be cleanly cut using vibratory knife or other acceptable equipment.
